

PERMANENT ANCHORS

Tractel® offers lifelines adapted to your buildings.

A - travsafte™ Bi-cable lifeline
Ensures perfect movement of the slider as it effortlessly passes the intermediate brackets, **without manual intervention**.

C - travflex™ 2 Single-cable lifeline
Allows horizontal movements when fixed to **steel work** or **concrete**. The slider allows the user to pass the intermediate brackets **without disconnecting**.

B - travspring™ Single-cable lifeline
Helps to secure horizontal movements while allowing the user to pass the intermediate brackets **manually**, using a twin lanyard.

D - travsmart™ Single-cable lifeline
Suitable for horizontal use on **steel deck** and **concrete roofs**. The slider allows the user to pass the intermediate brackets **without disconnecting**.

Tractel® and its partners are at your service to find the best solution for your buildings.
