

FABA™ Grip 150kg

The polyvalent slider for FABA™

The polyvalent FABA™ Grip slider is now upgraded to 150kg and conforms to the latest applicable standard and the new European Regulation.

It offers the best flexibility and comfort in the use of FABA™ ladders and rail A12 and AL2.

The leaning back and the wheels mounted on bearings features provide the best comfort for frequent use of any FABA™ A12 and AL2 installation.

FABA™ Grip 150kg

The polyvalent slider for FABA™

QUALITY:

- **Asymmetrical slider:** For ultimate safety, the slider can only be introduced in the direction into the rail or ladder.
- The **wheels mounted on bearings** improve the quality of sliding inside the rail and provide additional comfort during the use.
- Made in **strong and reliable stainless steel**.

ERGONOMICS:

- **Leaning back:** the perfect feature for climbing high installation.
- **Simple design:** designed to be used with one hand, the FABA™ Grip is a small slider, easy to handle and to carry.
- **Built-in safety:** thanks to its unique design, the FABA™ Grip can only be used in the correct position.

TECHNICAL CHARACTERISTICS:

- Complies with EN 353-1:2018 and the **PPE Regulation 2016/425**.
- Certified for users up to 150kg, including workwear and equipment.
- CE compliant.
- Available with trilock semi-automatic connector.

FLEXIBILITY:

- Can be used on our existing FABA™ ladders and rails A12 and AL2.
- Can be used in a variety of work environments.

SECURITY:

- **Lightweight:** easy to insert & use.
- **Integrated energy absorber.**
- Impossible to use incorrectly.
